DETAILED ACTION

1. Claims 1-17 are presented for examination.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, 8, 9, 13, 14, 17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Gamble et al (USPN 6,233,143).

Regarding claims 1, 8, 13 and 17, Gamble discloses a system, comprising: a carrier adapted to support a disk drive; a drawer having a receptacle; a drive mechanism mounted in the receptacle; sensors means

Art Unit: 2651

located in the receptacle for sensing the carrier; control means associated with the drawer, the drive mechanism, and the sensor means; wherein when the carrier is inserted into the receptacle, the sensor means senses the carrier and signals the control means to actuate the drive mechanism to engage and draw the carrier into the receptacle, such that the carrier is fully seated in the receptacle (see column 1 lines 40-57 and column 2 lines 19-40).

Regarding claims 2, 9 and 14, Gamble discloses that the carrier has a recess containing a pin that is engaged by the drive mechanism (see column 2 lines 35-40).

Allowable Subject Matter

5. Claims 3-7, 10-12, 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
